Theme for 2027 "Beavers, Bilz & Bedouins"

“Beavers, Bilz & Bedouins” – this motto charmingly brings together things that, at first glance, seem unrelated: natural history and adventure novels, the history of Radebeul and Karl May’s fantasy worlds.

The **beaver** shows the way – it symbolises the vibrant natural world on our doorstep and invites us to discover the Radebeul countryside with fresh eyes.

Bilz ensures we stay healthy – the naturopath playfully reminds us that every adventure requires strength and a clear head.

And the **Bedouins** are already waiting on the horizon – they form the bridge to Karl May, to a longing for distant lands and to the question of where reality and fantasy intersect.

Thus, the motto invites you to rediscover the familiar and to embrace unusual encounters. Grab your adventure hat and join us on a journey through local nature, good health and distant desert dreams!
