

# Irrwisch Theatre "Nujork Denzing Kwiin"

- Deutschland

Behind this quirky-sounding name lies a theatre production that is as imaginative as it is unconventional. The title itself is an ingenious play on words that evokes the famous American metropolis of *New York* and the districts of *Denzing* (a reference to *Denzlingen* or a fictional place?) – though viewed through the “Irrwisch”, as if through a distorting mirror.

The play transports the audience into a surreal, slightly chaotic world where everyday life and absurdity collide. With plenty of wit, slapstick and poetic moments, it tells of life’s trials and tribulations, of missed connections and unexpected encounters – very much in the style of a modern fairy tale set in an impossible city that can only exist on stage.

A production that delights with wordplay, fast-paced scenes and lovingly exaggerated characters, inviting the audience to let themselves be carried away by the “will-o’-the-wisp” of the imagination.
