

Ulik Robotic "RoboFusion#2"

- International

The international artists' collective Ulik Robotik combines circus, dance, technology and sculptural robotics in a breathtaking way to create a futuristic form of performance art that leaves the audience in awe and with a shiver down their spine.

With their two productions, 'Pas de Deux' and 'RoboPlane', they take the stage – and the skies – by storm. Whether it's an intimate duel of the senses or a spectacular aerial show.
